**TECHNICAL BULLETIN:**

**Acceptance of use of GypSorb Panels and GypSorb StreamLINE framing in NYC and 5 boroughs**

As per the Office of Technical Certification and Research (OTCR) NYC Buildings

“Products must be tested and/or listed and labeled by an Approved Agency (Approved Testing, Inspection or Product Certification Agency), in accordance with prescribed standard. **Department certification/approval is not required.** Products which require conformity to standards must be approved by an approved testing agency”

Based on our review of the NYC Building Codes (specifically chapters 8, 25, Appendix R and Title 1, Subchapter §101-07), GypSorb Perforated Gypsum Boards and GypSorb StreamLINE Framing System satisfy the criteria as prescribed and require no further approvals for use.
